

1. Go to the following link to learn all about sound. You can click on each picture to learn more about each section: <https://www.dkfindout.com/us/science/sound/>

2. Then follow this link to view a video called “Cymatics.” It is a really awesome video that shows some ways sound can actually be seen! <https://nigelstanford.com/Cymatics/>

*If you scroll down the page, you can see some behind the scenes moments.

3. Go to Chrome Music Lab and click on the sound waves section. Explore what high/low notes do to the sound waves.

<https://musiclab.chromeexperiments.com/Sound-Waves/>

What do you notice about how the sound waves move when you play the lowest note? The highest note? One in the middle?
